Turn your ideas into market-ready products.

01 BODY CARE TRENDS

"Body skinification" remains the foundation of body care, but a new concept known as "body state" now comes into play, addressing the question: What is my body experiencing right now?

BODY STATE

The condition of our skin changes depending on internal and external factors: life stage, climate, the exposome, the season...

The same person may have different needs depending on the moment.

LIFE STAGE

Pregnancy, postpartum, menopause, weight loss...

- STRETCH MARKS
- SAGGING SKIN
- BODY ACNE

CLIMATE AND EXPOSOME

Heat, cold, dryness, UV radiation, pollution...

- DRYNESS
- UV DAMAGE
- BARRIER FUNCTION ALTERATION

FRICTION, OCCLUSION, AND SWEATING

Tight clothing, sports, lack of ventilation...

- SWEATING
- MICROBIOME IMBALANCE
- BODY ACNE

From 2027 onwards, body care products will no longer simply address skin type (dry, sensitive, etc.) but will highlight **claims associated with "body state."**

02 NEW BODY CARE PRODUCTS

New “body states” inspire innovative product concepts that make it possible to address specific needs through more targeted and functional formulations.

01 IN-SHOWER BODY SERUM

Lightweight in-shower serums that quickly hydrate and condition the skin, leaving a soft, comfortable finish.

03 MOUSSE BODY TREATMENT

Airy, enveloping textures that melt into the skin, combining efficacy, lightness, and a distinctive sensory experience.

05 DISSOLVABLE BODY SHEETS

Lightweight, single-dose strips that dissolve upon contact with water, offering a practical, precise, and spill-free application..

07 MELTING BODY PEARLS

Single-dose pearls that melt onto the skin, releasing a nourishing, sensorial texture for targeted, precise care.

02 MILKY BODY ESSENCE

Ultra-light, milky textures that absorb quickly, providing hydration and comfort without leaving a greasy or sticky feel.

04 MASSAGE MORPH GEL

Gels with a transformable texture that evolve during massage, facilitating application and prolonging the sensory experience on the skin.

06 POWDER-TO-SERUM BODY TREATMENT

Concentrated powders that transform into a serum upon contact with water, combining efficacy, personalization, and an innovative anhydrous format.

08 SPRAY-ON BODY EMULSION

Lightweight spray emulsions that allow for quick and even application, even on hard-to-reach areas of the body.
