# TURN YOUR TIME INTO OPPORTUNITY

**Time** is the most valuable thing we have

*Now is the moment to value it and make every second count.*

**SKINSPAN / HAIRSPAN:**  
Self-care has evolved from  
correction to **preservation.**

**SKIN & HAIR LONGEVITY:**  
Long-term health &  
functional maintenance.

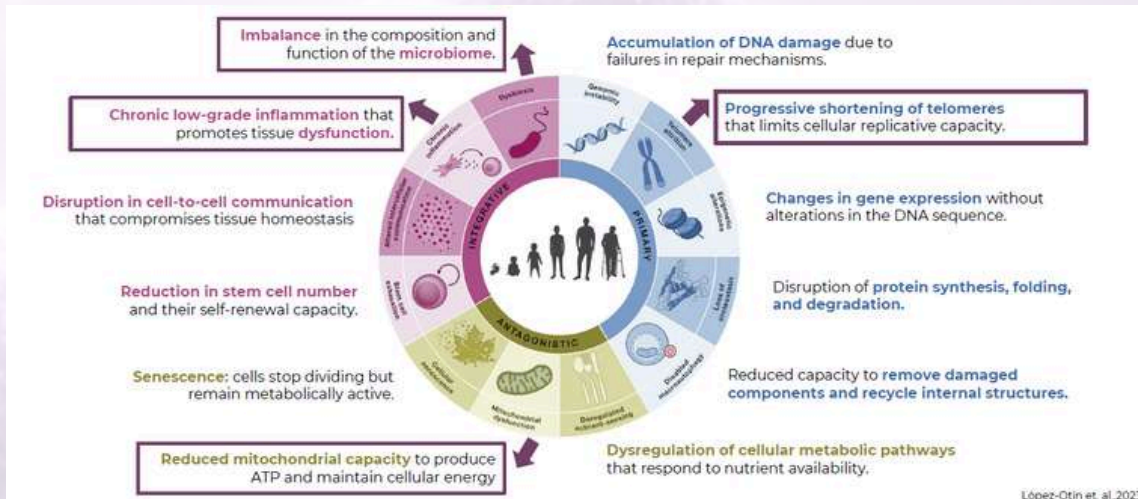

**WELL-AGING PARADIGM:**  
Positive, natural &  
healthy aging

# Postbiotic-powered skin longevity CYANAGE

CYANAGE is a next-generation **postbiotic active ingredient** obtained through advanced **biofermentation**, designed to act on the **Hallmarks of Aging** and restore the skin's biological functionality.

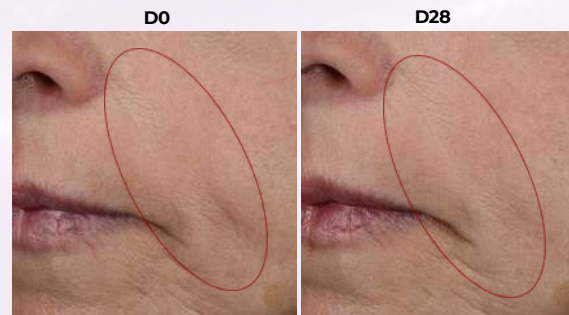

By addressing aging as a system of **interconnected mechanisms**, it helps reactivate the skin's natural processes of regeneration, defense, and balance:

12 hallmarks of aging

The result is a **visibly younger and healthier-looking skin**:

- **Wrinkle reduction**
- **Improved skin texture**
- **Firmness and elasticity increase**
- **Redness decrease**

# Beauty Begins with Balance

# BALANZZA

BALANZZA is a **natural multi-target anti-dandruff ingredient** obtained from stem cell culture of *Quillaja saponaria*, the soapbark tree.

Through metabolic induction process, the cultured cells generate a **complex bioactive profile** where **saponins** play a key role, supported by other **metabolites**, that **restore scalp balance**.

>-99%

reduction of *Malassezia furfur*

-26,2%

dandruff score in just 28 days

-54,29%

reduction of *Cutibacterium acnes*

Contact us for more info.

*Fermented Science for Scalp & Hair Care*  
**VINEACTYL**

**Biofermented** active ingredient derived from ***Vitis vinifera*** leaf extract, used as a substrate in a fermentation process involving ***Saccharomyces cerevisiae***.

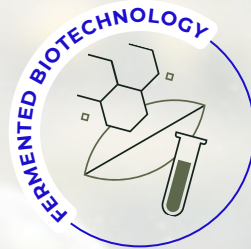

Its **boosted polyphenol content** its ideal for scalp care and to improve the overall quality of the hair.

- Hair breakage reduction
- Hair strength improvement
- Scalp hydration & comfort

**+26.4%** breakage strength

**-4,5%** hair shedding

**+33.4%** scalp hydration

# Cobiostem Alerce steps into the **exosome-inspired** skincare revolution

**Naturally enriched with extracellular vesicles**, it unlocks next-generation cellular communication for visibly revitalized skin.

Visualization of extracellular vesicles from Cobiostem Alerce by **Transmission Electron Microscopy (TEM)** and **analysis of the size of the vesicles**.

**EVs concentration  
(particles/mL) =  $1.5 \times 10^{11}$**
