

Immediate tightening and anti-wrinkle effect

COBIOLIFT

COBIOLIFT is a purified fraction of **polysaccharides extracted from Quinoa seeds** (*Chenopodium Quinoa*).

It is a **100% natural tightening** ingredient, with a significant film-forming and skin-tightening effect.

Its **3D structure** adapts perfectly to the skin surface, **creating a cohesive and continuous biological film**. This powerful film, with an **immediate lifting effect**, smoothes the skin surface, giving the skin a firmer and more radiant appearance.

INCI

Chenopodium Quinoa Seed Extract

DOSE OF USE

0.5-3 %

SOLUBILITY

Hydrosoluble

Important: In **emulsions**, it must be dispersed first before being added to the mixture so that it is properly integrated. In **suspensions**, ensure that the aqueous phase has sufficient consistency by using gelling agents.

Efficacy tests

IN VIVO

0,5% , 1,5%, 3% COBIOLIFT

 15 volunteers

 T=0, T=30' T=1H

IMMEDIATE LIFTING EFFECT

The objective of this study is to evaluate the immediate lifting, anti-wrinkle and smoothing effect of COBIOLIFT in the eye contour area. The VISIOFACE® 1000 D equipment was used for facial photographs and the PRIMOS® premium system was used to evaluate wrinkle depth, roughness and skin volume in the crow's feet.

COBIOLIFT 0,5%

30% wrinkle depth reduction in the **80%** of the volunteers with the lowest concentration after 1 hour application

COBIOLIFT 1,5% REAL IMAGES VOLUNTEER 2

COBIOLIFT 3% REAL IMAGES VOLUNTEER 11

SUBJECTIVE EVALUATION

73% of the volunteers highlighted a **firmness skin** with **0,5% of COBIOLIFT**

87% of the volunteers highlighted a greater firmness and softness with **1,5% of COBIOLIFT**

93% of the volunteers positively evaluated the **lifting effect** with **3% of COBIOLIFT**
