

# Environmental Hair Damage

Dry and de-lipidated hair is a common problem nowadays.

The main reasons for this increasing problem are:

- Climate and environmental changes
- The use of aggressive chemical substances: tensioactives
- UV exposition
- Hair aggressions: Bleach, perm, changes in coloration ...

This problem is increased in Summer time (Sun, Sea Water, Swimming Pools...)

## TRICHOMEGA

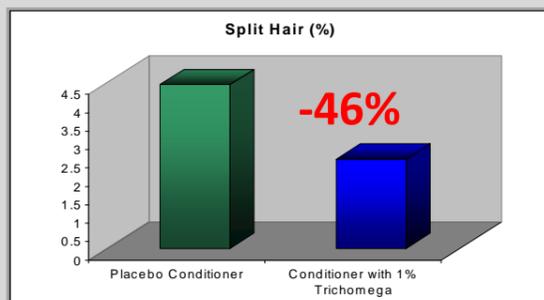

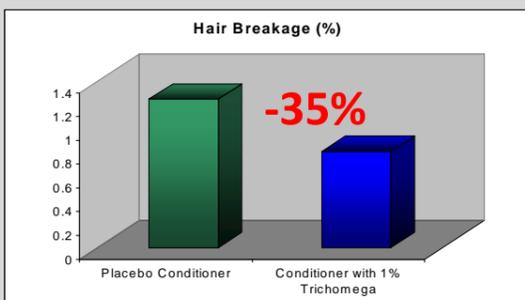

Deo version available

The oil of the Sacha Inchi (*Plukenetia Volubilis* Seed Oil) is the one with the highest content in Omega 3, 6 and 9 in the market. It has also a very important content in Delta and Gama Tocopherol, more than in any other seed oil.
